

SAI KUMAR REDDY KORSAPATI

»»» **OBJECTIVE** : To obtain a position in a Business Unit where I can utilize my skills, knowledge in solving various client requirements and have opportunity to improve myself for further development of myself and organization.

»»» EXPERIENCE

CTS - Cognizant Technology Solutions

Till Date, At Hyderabad

- » Technologies / Tools Used : Robotic Process Automation (RPA) - UI Path.
- » Overview : Creating RPA projects for various business specifications using Robotic Process Automation (RPA) - UI Path.

»»» PROJECT DETAILS

AMRS Schedule Returns

Project, At Cognizant

- » Technology : UI Path.
- » Applications Involved : Fund Processing System (FPS), Excel and Outlook.

This bot automates return of wire process in FPS application for a given suspension account, bot will extract wires from FPS for respective business date and match with data in input recon file to identify eligible and non-eligible wires. List of eligible wires will be shared to operations team to fetch branch claim status and reason of return and all the wires which were not claimed by branch will be returned by bot in FPS.

BSC Compliance Review Reports

Project, At Cognizant

- » Technology : UI Path.
- » Applications Involved : COPS, Navigator, Excel and Outlook.

This bot will conduct a compliance check for the given clients in COPS system, all the client details will be collected from COPS system and it will be validated with given data source. Finally bot will prepare a review report and the report will be shared to operations team if manual process is required or else report will be uploaded to COPS system.
